

The team

Armin Bauer is the technical brain behind amiando. Armin is co-author of multiple software programs such as the open source Software OpenSync and libsyncml which are used worldwide. In addition, Armin is a graduate of the CDTM program at the TU Munich.

Dennis von Ferenczy is responsible for strategic issues, corporate communication and marketing. The scholar of the German National Academic Foundation (“Studienstiftung des Deutschen Volkes“) has worked for McKinsey and has founded the software company Loft89.

Felix Haas brought the founder team together and is responsible for the conception of the product and investor relations. He studied electrical engineering at the TU Munich with terms abroad at Silicon Valley. He is co-author of several patents, such as the interface between online services and vehicles that was created by Google and BMW.

Marc P. Bernegger is both responsible for sales in Munich and the country manager of the Swiss market. In addition to his studies at the university of Zurich, Marc has gained experiences in legal and finance areas. After having graduated from university, he worked for a law company and founded and built up the platform usgang.ch, which is the leading event platform in Switzerland

Markus Eichinger and Felix Haas came up with the basic idea for amiando. Markus is in charge of operations, project management, recruiting and the set up of international teams. As a scholar of the German National Academic Foundation (“Studienstiftung des Deutschen Volkes“), he studied mechanical engineering at the TU Munich and at the University of Cambridge (GB). He is co-founder of the IT-agency be-solutions and a non-profit organisation.

Sebastian Bärhold is chief financial officer and responsible for finances and legal affairs. During his studies of business administration in Munich and Chicago, he gained practical experiences at KPMG and Mercer Management Consulting. Moreover, he helped founding two non-profit organisations.
